Dear Hiring Manager,

Dear Hiring Team,

I'm excited to apply for the Software Engineer position. I have 6+ years of experience building scalable backend and full-stack products using Node.js, TypeScript, NestJS, JavaScript, Golang, React, PostgreSQL, MongoDB, Redis, Kafka, and AWS.

I've worked across fintech, payments, SaaS, and enterprise platforms, building microservices, REST APIs, event-driven systems, third-party integrations, authentication workflows, and cloud-native infrastructure.

At Tilli Software, I worked on a payment management platform that scaled to 30M+ transactions, contributing to payment processing, reconciliation, reporting, and distributed services with a strong focus on scalability, reliability, and performance.

I also have hands-on experience with Docker, Kubernetes, CI/CD, Terraform, and AWS services including S3, Lambda, ECS, EC2, RDS, API Gateway, and CloudWatch.

I enjoy taking ownership end-to-end—from understanding requirements and designing architecture to development, deployment, monitoring, and production support. I'd love the opportunity to bring this experience to your team.

Best regards,

Arvind Kumar Sahu
